

AGENTIC SYSTEM OF INTELLIGENCE (ASOI)

How far is your architecture from an ASOI?

A two-week, architect-led assessment. We score your architecture against the Dynagentic reference for an Agentic System of Intelligence (ASOI), then design how to close every gap.

FIVE DOMAINS, SCORED CONCERN BY CONCERN

Reason

Think, Know,
Describe,
Predict,
Calculate

Execute

Act, Coordinate,
Connect

Govern

Policy, Intent-
aware,
Assurance,
Evidence

Operate

Assure, Run,
Observe

Adopt

Enable,
Onboard, Scale

How it runs

Week 1: Assess

Architect-led interviews with your platform, data, security and risk leads. Review of artifacts and environments. A workshop where your team scores and we challenge with evidence.

Week 2: Design

Gap analysis against the ASOI, a design recommendation for every gap, a sequenced roadmap and an executive readout.

What you keep

One interactive microsite your team keeps using.

ASOI Scorecard. Scores for every concern, with the evidence beneath.

Gap Map. Gaps ranked by what blocks production.

Design Recommendations. A target state for each gap.

Closure Roadmap. Sequenced, sized by effort.

SCORED ON FOUR LEVELS, WITH EVIDENCE BEHIND EVERY SCORE

1 Absent**2** Partial**3** Established**4** Reference grade

Request an assessment

Fixed fee. Credited toward a Think Big Strategy or Build program if you continue.
